ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: **ADJUSTABLE SIDE BOLSTERS**

(57) Abstract: A seat frame assembly (14) is provided for compactly folding a motor vehicle seat. The seat frame assembly (14) includes a pair of spaced apart and parallel side frame members (16, 18) defining a vertical plane, and a lower cross member (26) extending between the pair of side frame members. An actuator (30) is pivotally secured to one of the pair of side frame members. A linkage assembly includes first (38) and second (40) link members, which are pivotally secured to one another. The first link member extends between the actuator and the second link member. A control arm (36) is fixedly secured to the second link member and pivotally secured to the lower cross member. When the actuator is pivoted, the control arm moves between a support position extending away from the side frame members and a stowed position co-planar with the side frame members.
